5118008 English for Software Developer

Word Quiz Game

8 Apr 2024

Shin Hong

Project Overview

- We are going to construct a C program for interactive word quiz game to enhance vocabulary of the user
  - text-based user interface

- You are asked to host the project on GitHub to practice collaboration and communication skills
  - of course, you need to use English

WordQuiz

- https://github.com/hongshin/wordquiz

Task
https://github.com/hongshin/wordquiz

- List up at least ten TO-DO items for the project
  - Write a few sentences to describe each work item
  - Examples
    - add new features
    - improve UI
    - fix errors

- Create a Google doc to write the TODO items
  - share it with hongshin@gmail.com

Task – May 13

- For each team, one member creates a GitHub repository containing the initial version of WordQuiz
    - become the project owner
    - invite other members as collaborators

- Each member must perform the following actions
    - install git-client in the local machine and clone the repository
    - add two issues to the issue tracker
    - push two commits to the repository, which address the raised issues
        - write commit messages carefully

Personal Homework 1

- Write one-page summary report of your issues an commits
  - including the links to the issues and commits

- Submission
  - By 10 AM, May 20 Mon
  - Via LMS
